Continuation of 5. does NOT place the application in condition for allowance because: The prior art includes all the limitations set forth by the current claims, 13-25. The Office has provided translation of the prior art JP 50-36361 which will be cited on an 892. Applicant argues, "Kanebo clearly does not disclose, or even suggest, providing on an inner surface of the carreir a coating of an oxidaizing agen having an oxidation potential that is sufficient to oxidze SO2." The prior art has all the limitations of the amended claims: a hollow area disposed in the carrier (the hollow area can be any of the area within the honeycomb shaped filter or any of the figures a-f), bounded by an inner surface that can be exposed to a gas and is provided with a coating of an oxidizing agent (this is merely the layer of activated carbon impregnated with potassium permanganate for oxidizing SO2).
